WORK EXPERIENCE

Chief Executive Officer

Knowledge & Skills SAS

September 2020 - December 2022 | Mâcon, Saône et Loire, FRANCE

- Founded the startup, built the brand, business plan, and pitched the project
- Secured funding from BNP, BPI France, the EU, AWS and crowdfunding
- Designed, supervised a team, and managed the web platform KS-Portal® project from concept to market, destined to engineers and scholars
- Created and launched the web platform KS-Conference for conference organizers, which hosted the 6th CIRP conference on Surface Integrity

Scientific Researcher in Manufacturing Processes

Karlsruhe Institute of Technology

January 2019 - July 2019 | Karlsruhe, GERMANY (as visiting researcher)

- Collaborated with researchers from KIT Germany, ENSAM France, and Federal Institute of Paraiba Brazil for scientific research and publication
- Modelled a hybrid machining process and its impact on surface integrity
- Performed numerical simulations with FEM and coded subroutines

Consulting Engineer - Sustainability in Product Design

GoConcept - Faurecia Clean Mobility

September 2017 - December 2018 | Belfort, FRANCE

- Advised the client Faurecia Clean Mobility on R&D site (automotive leader)
- Designed and performed material characterization tests for the client
- Created material models for stainless steels used in exhaust systems
- Performed predictive simulation of fatigue behavior at high temperatures
- Collaborated with Faurecia's team for results enhancement

Mechanical Engineer - Manufacturing processes

AMVALOR

September 2013 - August 2017 | Cluny, Saone et Loire, FRANCE

- Led the project "Characterizing and modelling surface integrity induced by machining and its impact on the functional performance and life of the components" for the client CEA Valduc (nuclear energy leader)
- Executed experiments for material characterization and machining processes
- Created numerical models for the processes and the components
- Analyzed electrochemical behavior and corrosion resistance
- Performed analytical and statistical analysis of the results
- Supervised interns and lectured mechanical engineering and PhD students
- Wrote publications and presented in international conferences

Languages: English – French – Arabic - Portuguese

SUMMARY

My career has spanned the worlds of academia and industry, with a Ph.D. in mechanical engineering paving the way for both research and leadership roles. As CEO, consultant, mechanical engineer, and a researcher, I brought my technical expertise and scientific knowledge to the forefront, experiencing across various technical fields in energy, automotive, and IT sectors, hinting at a multifaceted and accomplished professional journey.

EDUCATION

PhD. in Mechanical Engineering

Manufacturing Processes (2016)

+MSc. in Materials and Engineering (2013)

Arts et Métiers Institute of Technology

📍 Paris, FRANCE

SKILLS

Manufacturing processes - Surface integrity - Finite Element Analysis - FEM - Product design - Sustainability - Material constitutive modelling - GD&T - Machining - Metal cutting - Material characterization - Mechanical design - CAD/CAM - Sustainability - Wear - Tribology - Electrochemical and Corrosion analysis - Statistical analysis - Lean manufacturing - Scientific communication - Business management - Business Plan - Team management - Team work - International collaboration - professional instruction - UX/UI - front end development - AWS for static and dynamic websites – iOS app – Android app – Xcode - Cursor

AWARDS

- Femme Entrepreneuses Orange (2022 - France)
- EdStart Innovators by AWS (2021 - Europe)
- 1st Scientific Prize for PhD thesis MUGV-Manuf21 (2018 - France)
- Medal of the Tunisian Association of Mechanics (2012 - Tunisia)
