Key Partners

The organisations

Les Premières, France Active, Initiative, BGE France, AWS EdStart

The financial supporters

BPI France, BNP Paribas, France Relance, AWS

The editorial board

Dr. Eng. V. ASTAKHOV

Michigan State University and General Motors Unit of PSMi - USA

Dr. Eng. P.A. MARQUES

Auchan Retail and Universidade Lusófona de Humanidades e Tecnologias - PORTUGAL

Dr. Eng. J.A. REGLERO RUIZ

Polymer Research Group, University of Burgos - SPAIN

Dr. Eng. M. JEROUANE

PSA TRNAVA - SLOVAKIA

Pr. C. BOURAOUI

Doctoral School - National Engineering School of Sousse ENISo - TUNISIA

Pr. T. BOURAOUI

President of "Association Tunisienne de Mécanique ATM"- ENIM - TUNISIA

Ass. Prof. P.A.R. ROSA

Instituto Superior Técnico - Lisbon - PORTUGAL

Ass. Prof. F. A. V. da SILVA

Federal Institute of Paraíba - Cajazeira - BRAZIL

Ass. Prof. B. EL MANAA

Dhofar University - OMAN

Ass. Prof. L. TANER TUNC

Sabancı University - TURKEY

Emeritus Pr. A. DOGUI

Ex dean of the University of Monastir TUNISIA

Pr. T. BEN ZINEB

Polytech Nancy - University of Lorraine –FRANCE

Pr. J. RECH

LTDS/ENISE - FRANCE

Pr. R. Singh

Indian Institute of Technology Bombay – INDIA

Dr. Eng. J. REBELO KORNMEIER

Technische Universität München - GERMANY

Key Activities

Marketing and business development

B2B prospecting, partnerships and international relations with organizations, research institutions and universities, community management, B2C relations and copywriting

Edition and production management

Editorial management of the Knowledge and Skills video journal (peer review process, edition and publication), production of content, organisation of videoconference classes, management of workshops and conferences requiring telepresence robots

Platform technical management and development

Management of the back office and website pages update, development and maintenance of the SaaS and cloud computing (AWS), technical assistance

Administrative management

Accountancy, administrative and legal issues

Key Resources

Human resources

1 PhD in engineering (permanent)

1 university professor (permanent)

1 intern in business development (temporary)

2 engineering interns (temporary)

1 computing engineer (outsourced)

Physical resources

1 Elastic Cloud server (AWS)

1 Cloud Database bucket (E3)

4 Web domains

3 computers fully equipped (hard and software)

2 professional photography and recording sets

Intellectual resources

2 registered trademarks (Knowledge & Skills and KS-Portal) +1 registered logo trademark

Financial resources

30k euros as private and public bank loans

6k euros as founders investments

2k euros as free equity grants

Value Propositions

With the Talent Portal specific to engineers and scientists in the fields of mechanical, electrical, materials and industrial engineering, our services are affordable, the edition, publication and prospecting are easy, time and cost efficient with our online platform. An international audience is targeted, a referencing in scientific databases is gained, and remuneration is granted via a secure online environment.

With the Apprentice Portal, thanks to the peer review process by highly qualified experts, the quality of the proposed technical and scientific material is guaranteed, and the request for a competent instructor is answered at the right moment without geographic limitation. The online platform is mobile friendly and easy to use. For learners with disabilities: all video materials present in our library are subtitled, especially for users with hearing issues. Users with mobility disabilities or facing mobility restrictions (as those imposed by Covid-19 context) can also profit from a remote presence (either with videoconference or telepresence robot)

Customer Relationships

Apprentice customers expect rich and trustful scientific and technical content, besides rapid answers to their requests. To retain them, content should be updated and diversified regularly, prices should stay affordable with some openaccess content.

Talent customers expect an easy to use, secure and affordable platform. To retain them, their videos and classes must find audience, and they should gain in visibility.

Channels

1-Partnership conventions with scientific associations and academic institutions reached directly via colleagues and acquaintances network (most efficient channel and cost effective till now)

2-Presence at international scientific conferences (good channel)

3-Presence at international industrial forums (not yet tested)

4-Referencing in scientific databases (mid-term and long-term efficient)

5-Web referencing and social media like LinkedIn and Researchgate (necessary, tested but not yet cost effective)

Customer Segments

a) Content buyers (apprentice users):

- Companies wishing to train their employed engineers
- Engineers, scientists and master's or doctoral students wishing to acquire non-degree training

b) Content creators (talent users):

- Training organizations and institutions for engineers
- Associations/organizations of engineers or scientists
- Academic and scientific research institutions/universities
- Individual engineering instructors, PhD engineers and university assistants, lecturers and professors interested in scientific publication or in earning remuneration selling their content/online class.

Customers can be located anywhere as the platform is online and accepts international payments, but our target is essentially EMEA region, especially the European Union, Middle East Gulf region, and North Africa

Cost Structure

Value Driven Business

premium value creation and proposition, but remains on economies of scale

Activities costs repartition

	for 2022	for 2025 (broadcasting)
- Marketing and business development	60%	40%
- Edition and publication management	5%	25%
- Platform technical management and development	20%	25%
- Administrative management	15%	10%

Costs repartition according to resources

- Human resources	52%	80%
- Physical resources	15%	2%
- Other variable costs	33%	18%

Revenue Streams

Fixed pricing for all B2C services, possible negociation for B2B clients

The "Apprentice" offer: (60% of overall revenue in 2022, up to 80% in 2025)

Paid content is subject to the following pricing:

- Recorded video presentation: between 50 and 250 euros / unit
- Live course with a videoconference instructor: between 250 and 750 euros / seat
- Scientific conference replay: depends on the partner
- Live workshop/conference with robotic telepresence solution: a quote is necessary, the price depends on the geographic position of the meeting organiser. (represents 20% of overall revenue)

The "Talent" offer: (40% of overall revenue in 2022, down to 20% in 2025)

All audiovisual content published on the platform must be subject to a peer review process managed by a partnership agreement or, failing that, to the following pricing:

- The price of a service including peer review: 50 euros / hour.
- The price of a service including peer review with edition and enhancement of the content (formatting, trailer, subtitling, VoiceOver): 100 euros / hour.
