

Internship report: July 1st to August 13th

Company: Knowledge and skills

Internship in Community management

by Maram Ben Haddada

Student in bachelor in science of business administration

Scholar year 2020/2021

Tunis Business school

University of Tunis

Supervisor: Dr. Eng Lamice Martins do Outeiro

Acknowledgement

It is my radiant sentiment to place on record my best regards, deepest sense of gratitude to Dr.Lamice Martins do Outeiro for offering me this opportunity and for her careful and precious guidance which were extremely valuable for my study both theoretically and practically.

I am extremely grateful to everyone who helped me in successful completion of this internship.

I perceive as this opportunity as a big milestone in my career development. I will strive to use gained knowledge and skills in the best possible way, and I will continue to work on their improvement, in order to attain desired career objectives. Hope to continue cooperation with all of you in the future,

Executive summary

This report summarizes my internship program from July 1st to August 13th as a community manager intern at Knowledge and skills. I've come to believe that the value of this job lies not in the tasks it involves, but in its role as a vital training ground for anyone new to marketing. The ability to interact directly with customers and potential customers is exactly what makes this position so important, and it provides crucial experience for anyone who might have ambitions of becoming a growth hacker or product manager.

This internship report will act as a bridge between my studies at university and my future career in digital marketing . It will collate the knowledge I have gained from observing , examining , and performing tasks associated with community management in an online environment.

This report is divided into 3 chapters, the first one deals with the presentation of the company Knowledge and Skills .The second one focuses on the marketing applied to the company and the third chapter highlights the main tasks that have been assigned to me during this internship .

Company presentation

About the company

KNOWLEDGE AND SKILLS, a simplified joint-stock company with a single shareholder with variable capital (minimum 1k euros, maximum 100k euros), located at Cité de l'Entreprise, 200 Boulevard de la Résistance 71000 Mâcon, FRANCE registered in RCS Mâcon under number 891 952 939, activity category code APE : 6201Z with VAT identification number: FR48891952939.

Knowledge and Skills is a company specialized within the creation, development, exploitation and commercialization of any digital support associated with online instruction and scientific publication in the fields of materials, mechanical, industrial and electrical engineering, besides scientific and engineering practices.

The company encourages young engineers, PhDs in engineering and scientists to place their skills at the service of industry in order to make professional progression.

In 2021, Knowledge and Skills launched the SaaS KS-Portal, which is originally created to make audiovisual scientific and technical publication a trusted reference with the same credibility as text based references published in scientific journals and books by adopting a comparable peer review process.

The added value

Knowledge and Skills Portal KS-Portal is one of the first platforms to publish reliable video content approved by scientists and engineers. It is open to companies, independents and engineering students.

It aims to develop engineering skills by sharing scientific knowledge through video presentations, virtual lectures and tutorials created by experts, university professors and PhD engineers from all around the world .

KS-Portal offers also a replay feature for scientific conferences, so that anyone can enjoy its valuable content anytime and anywhere.

The team

The company's team is formed by carefully selected partner institutions and editorial board members, that are highly qualified and graduated from well known universities. They guarantee the quality and credibility of the scientific content delivered through our KS Portal.

Editorial board members

Dr. Eng. Lamice MARTINS DO OUTEIRO - CEO & Founder of Knowledge and Skills

Prof. J. C. OUTEIRO - Editor of KS-Portal - Assoc. Prof. with Habilitation (HDR) in manufacturing processes at Arts et Metiers Institute of Technology France

Prof. V. ASTAKHOV - Senior Tool Research and Application Manager - professor of Michigan State University USA

Prof. P.A. MARQUES - Expert in Lean Management | Certified Six Sigma Black Belt | PhD in Industrial Engineering - Lusophone University of Humanities and Technology Portugal

Pr A. BENAMARA - Full Professor - General Director of Publishing Center - Ex general director of Higher Education at the Ministry of Higher Education and Scientific Research of Tunisia

Pr. T. BEN ZINEB - Full Professor in Materials engineering - University of Lorraine France

Pr. Em. A. DOGUI - Emeritus Professor in mechanical engineering - Ex dean of the University of Monastir Tunisia

Prof. L. TANER TUNC - Assoc. Professor - Faculty member in Manufacturing Engineering Graduate / Undergraduate Program at Sabanci University Turkey

Prof. B. EL MANAA - Assoc. Professor in Electrical Engineering at Dhofar University Oman

Prof. F. A. V. da SILVA - Assoc. Professor in Mechanical Engineering at Federal Institute of Paraiba Brazil

Prof. P.A.R. ROSA - Assoc. Professor in Materials engineering at Technical Institute of Lisbon Portugal

Pr. T. BOURAOUI - Full Professor in Mechanical engineering at the National Engineering School of Monastir- President of "Association Tunisienne de Mécanique ATM" Tunisia

Pr. C. BOURAOUI - Full Professor in Mechanical Engineering - President of the doctoral school of ENISo Tunisia

Pr. J. RECH - Full Professor in Mechanical Engineering - Manufacturing Processes at the National Engineering School of St Etienne France

Prof. R. Singh - G. K. Devarajulu Chair Professor - Mechanical Engineering professor at the Indian Institute of Technology of Bombay India

Marketing applied inside Knowledge and Skills

1- Target

Content buyers

- Companies aiming to train their engineering employees
- Particulars wanting to acquire information or trainings who are generally engineers, scientists and Master or PhD students in the fields of mechanical ,material, industrial electrical engineering.

Content creators

- Training institutions for engineers
- Engineers or scientists organizations
- Academic institutions for scientific research
- Engineering instructors, PhD engineers, university professors

2- Market

Global market environment

	+	-
P	Due to the global pandemic, European governments are imposing remote working which implies the necessity of e-learning	Restrictions to access some websites in some area for legal regulations
E	Evolution of the e-learning market by 16.4% worldwide, 15% in France. Less costs for learning	The purchasing power is getting affected by the economic crisis. Services and technologies related to content creation are relatively expensive
S	Professionals opting for online solutions to survive the global pandemic. Students and professors are getting familiar with e-learning tools. -Flexibility with time.	Loss of physical contact with trainers. Self learning culture is still unpopular in France. Lack of motivation due to high flexibility of e-learning.
T	Easy access to internet due to 4G, 5G etc..	Need of protection against cyber attacks
E	E-learning is more eco-friendly (less wasted papers, and CO2 coming from transport)	Growing consumption related to digital use
L	Inclusion of e-learning in labor legislation code since March 2014	Rigid regulations concerning web activities and e-commerce in EU. Strict regulations for copyrights, distribution and publishing of educational materials.

Table 1. PESTEL matrix.

3- Competitors

Competition in the e-learning industry is divided into 3 segments depending on the supply:

- 1-Generalist instruction offer
- 2-On demand instruction offer
- 3-Educative software

The competitors of Knowledge and Skills concerns the two first segments.

Global competitors: Udemy ,Lynda, Udacity ,Coursera ,EdX ,Iversity..

4- Customers

Segmentation

Stakeholders:

- *Schools/ Universities
- *Private companies/ institutional organizations
- *Individuals

5- Organizational chart and human resources

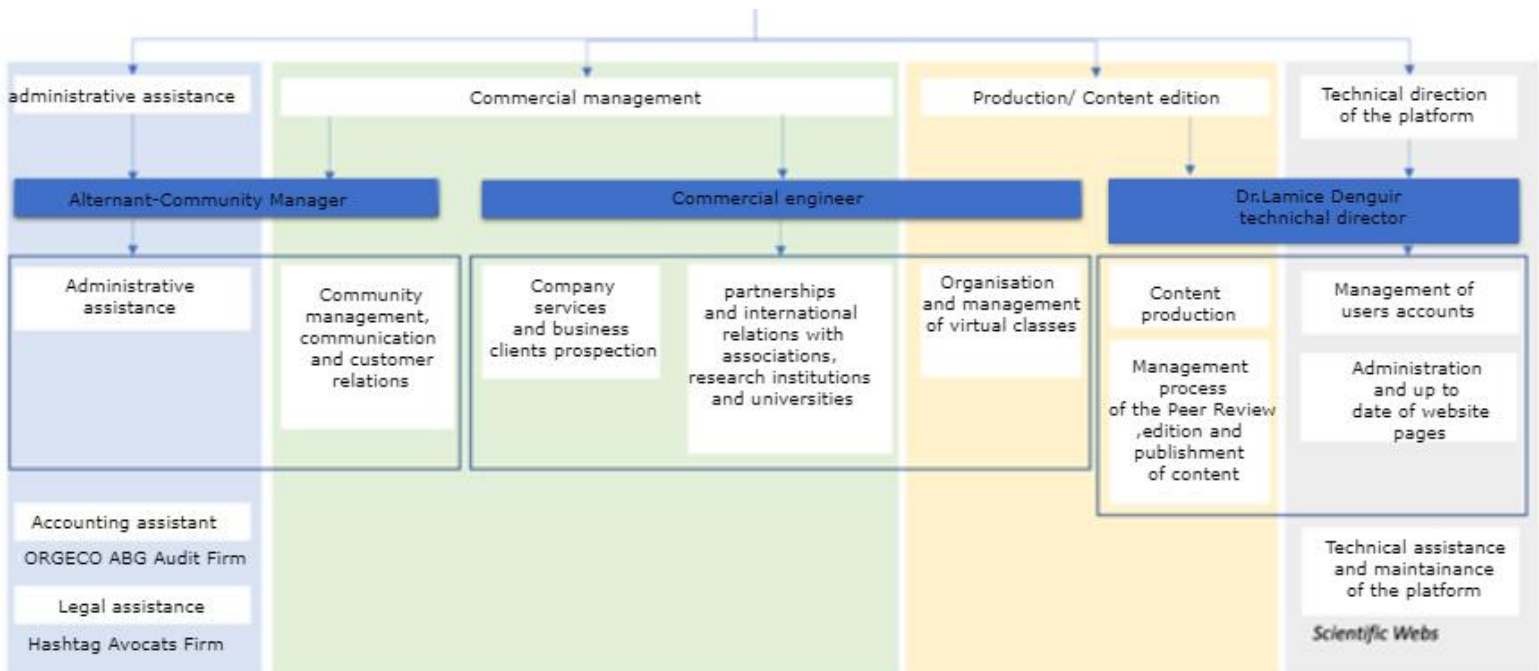

Figure 1. Organizational chart.

6- Logistics

Knowledge and skills customers are divided into 2 categories which implies different logistics : Talent approach for trainers, and Apprentice approach for trainings buyers.

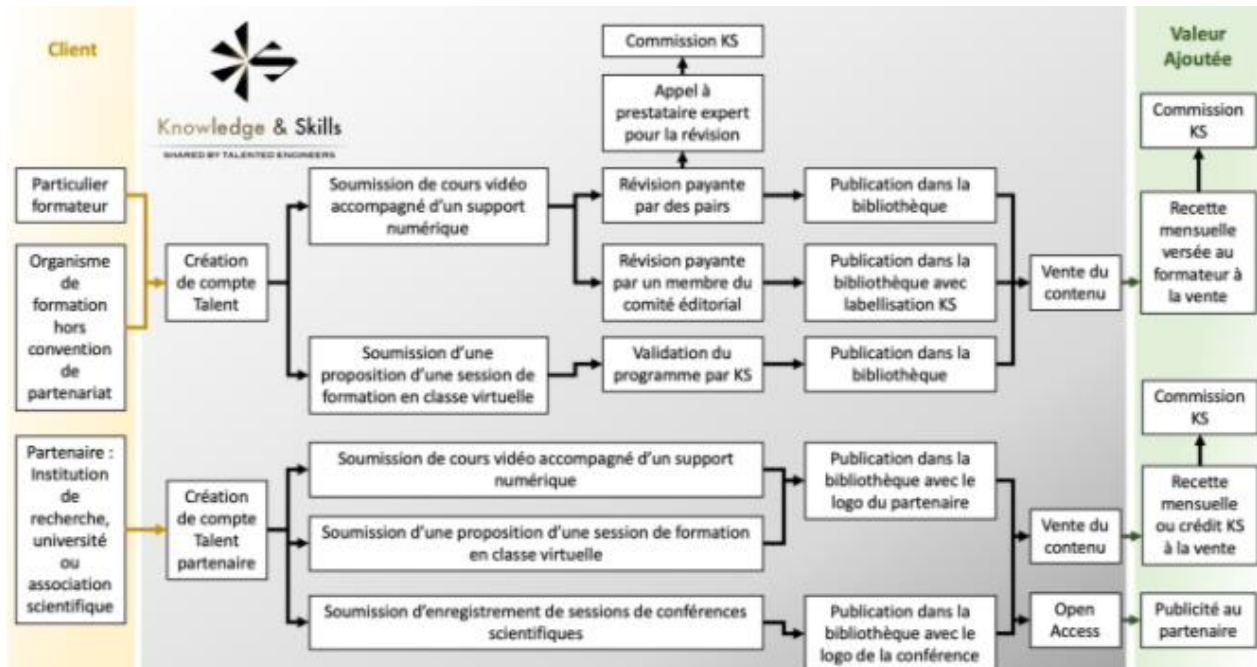

Figure 2. Valor creation chain for instructors.

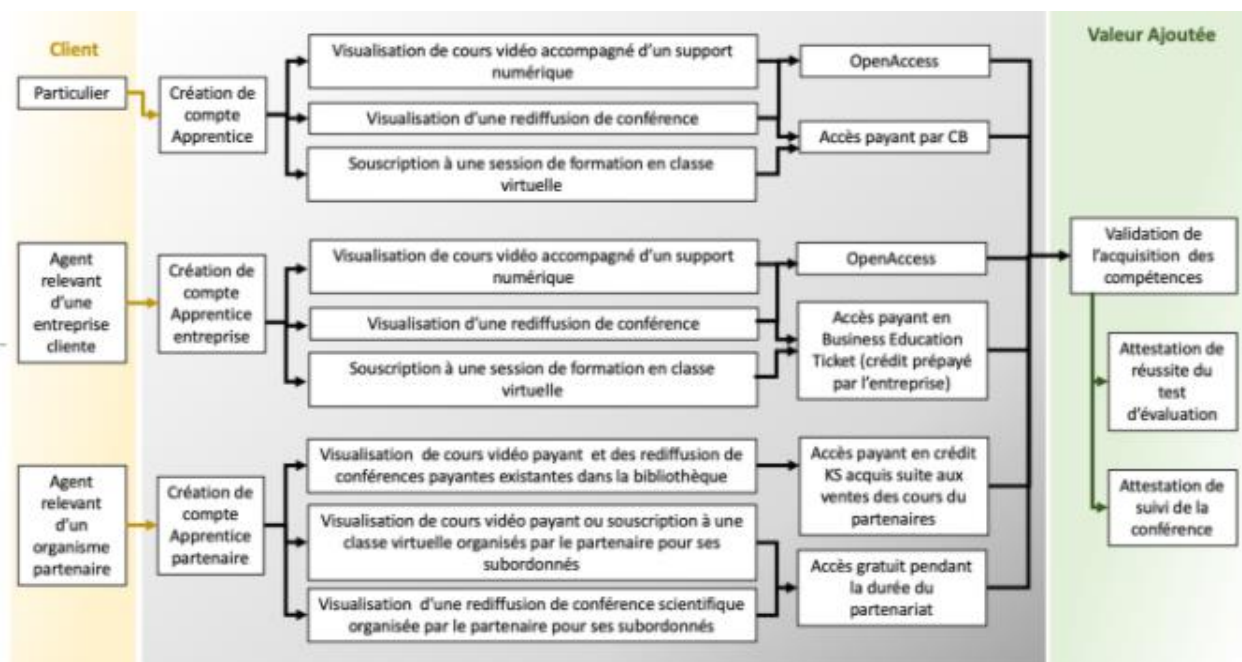

Figure 3. Value creation chain for apprentices.

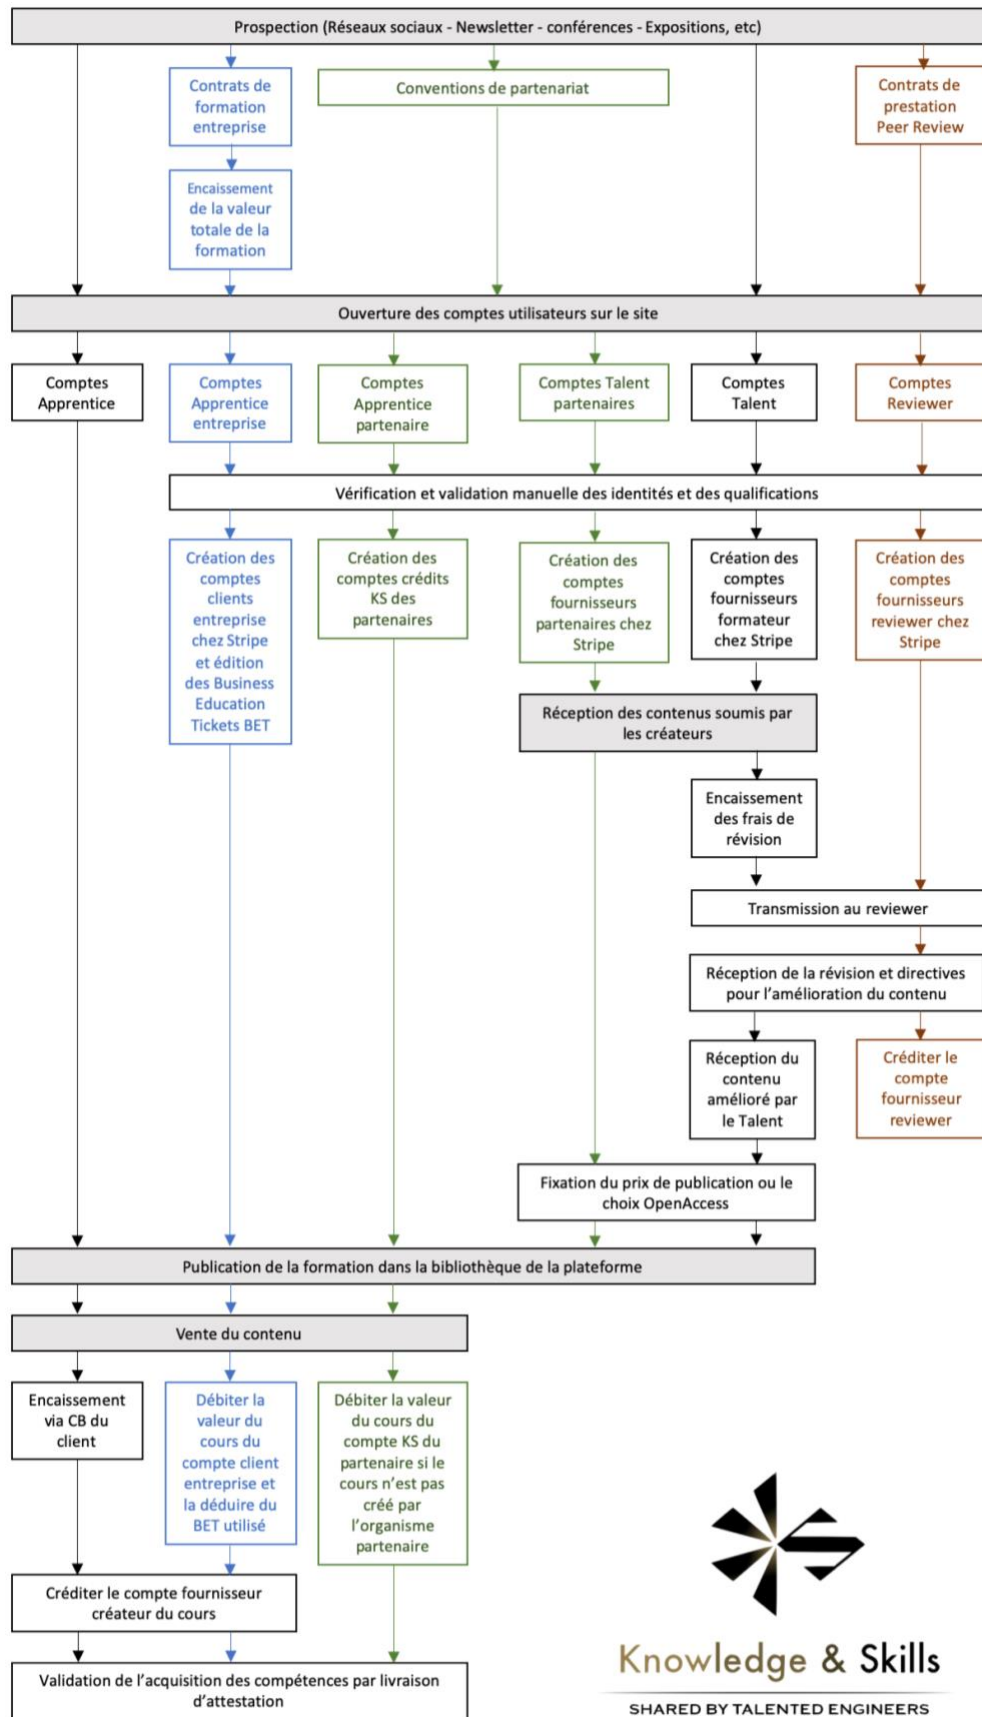

Figure 4. Internal logistics of the SaaS (Software as a Service)

**Business education Ticket: While opening a Business Aprentice account, the company must determine in advance the total amount dedicated to its employees instruction. Therefore, a training credit is open for the company with the same amount paid. Depending on the number of employees concerned by the training and the business client choice, the credit will be distributed among the employees user accounts.*

**KS credit account: when a partner prefers not to be paid in currency after submitting a paid content on the platform, he can convert his remuneration into KS credit that can be used on KS-Portal to buy content.*

7- Communication:

Stages	SEO	Annual participation in conferences	Annual exposition at a forum
Launch date	Mai 2021	January and June starting 2022	March starting from 2022
Objectives	- Attract content creators - attract private content buyers (2000 followers)	- Attract universities for content creation (16 contracts) - Build partnerships with research institutions and universities (8) - Attract companies interested in purchasing trainings (4 companies)	- Signing instruction contracts with companies (10 companies)
Target	- Engineers and PhD engineers	- Academics in the fields of mechanical, electrical, industrial and materials engineering - International companies in scientific instrumentation, tool manufacturing, aeronautics and automotive manufacturing	- VSE / SME of design offices and engineering consulting - VSE / SME subcontractors for automotive, rail, energy production, aeronautics and biomedical manufacturers - scientific instrumentation, automotive, rail, energy production, aeronautics and biomedical
Message	- Company presentation - Activity presentation - Services demonstration	- Free advertising of programs given by partner university institutions for professionals - Sharing of knowledge between scientists and provision of quality content - Provision of a shared rebroadcasting service specific to conferences and seminars	- First e-learning platform for engineers offering content submitted to the international peer review process - Response to the specific needs of companies - Freedom and flexibility of access to information - Competitive prices
Supports	- Social networks Facebook, LinkedIn, Twitter et ResearchGate - SEO - Newsletter	- International scientific conference	- Flyers - brochure - Goodies
Price	1000 euros	2000 euros	10 000 euros
Partners	BGE Mâcon (Organizationn)	- CIRP (Organization) - Association Française du Prototypage Rapide - Association des Docteurs et Doctorants des Arts et Métiers ADDAM - Association Tunisienne de Mécanique	BPI France - la French Tech

Table 2. Communication matrix.

8- Strategic analysis

The SWOT analysis

Stenghts	Weaknesses
- Important network in the academic and industrial sectors - Support from some organizations - Manager's experience in project management, training engineers and reviewing scientific content - 100% dematerialized work, remote work planned for the year 2021 generating savings in terms of lease costs and related costs - Support from Pôle Emploi and credit allocation until 09/2021	- Lack of funding making it impossible to recruit the 1st year - Possibility of work overload for the director - Dependence on subcontractors in terms of technical assistance, accounting and juridiction
Opportunities	Threats
- Booming e-learning industry - Governmental support for ICT projects - Growing demand for remote learning following the health crisis - Need for continuing education to follow the transition to Industry 4.0 - Affordability of digital equipment prices and generalization of internet access all over the world	- Appearance of competing websites using a similar business model over the next 3 years - Weakening of the website's protection against cyber attacks following the appearance of new threats

Table 3. SWOT matrix.

The strategy to attenuate the impact of threats and weaknesses is defines down below:

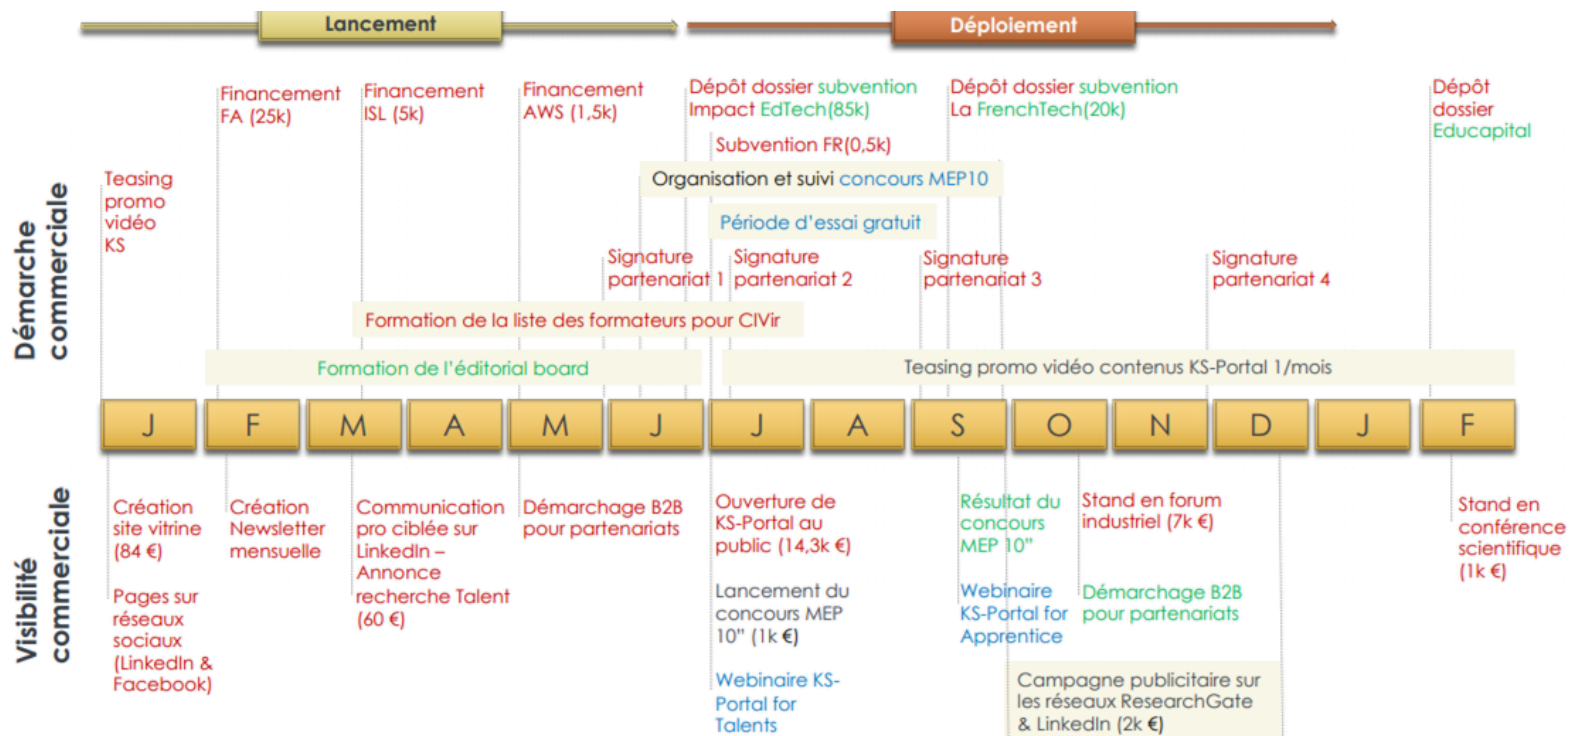

- Fundraising to raise capital at the end of 2021 or beginning of 2022 .
- A possible recourse to the subcontracting of administrative assistance and community management by freelance agents on an ad hoc basis during periods of work overload.
- Possibility of hiring an IT engineer to provide technical assistance for the platform, maintenance of the site, updating pages and data and securing the site from the 2nd year if the targeted turnover is reached.
- In terms of competition, the site is keen to stand out from the existing one by making improvements to the user journey and adding new options at least once a year based on customers feedback.

9- Development perspectives

	Editorial service	Apprentice portal	Talent portal	Partner organizations
Priority axis	Finance a part-time position	Publish 10 content video per month -finance a full time position -30000 euro budget for ads	Sign exclusive contracts to organize training sessions (4 per month)	Sign exclusive contracts to replay conference with 3 partners -Retain partners
Commercial asset	An editorial committee of international reputation	Peer review high quality -Academically referenced posts	Partnership with well known trainers	Ready-to-use infrastructure , free secure space to publish conference
Commercial effort	Organizing workshops Customer service	communication	communication	Prospecting with scientific associations -Customer service

Table 4. Development outlook.

10- Action plan:

11- Performance of the strategy and commercial visibility

Priority	Indicators	Objectives	
		Quantitative	Qualitative
Target1 Engineers	Number of accounts « apprentice » created	N° of accounts created N° of videos sold N° of places sold for virtual classes	Sales evolution , customer satisfaction rate
Target 2 : Master students and PhD students	Number of accounts « apprentice student » created	N° of accounts created N° of videos sold N° of places sold for virtual classes	Sales evolution , customer satisfaction rate
Target 3: Trainers	Number of accounts « talent » created	N° of videos submitted to sell N° of classes organized	Diversification of specialties Diversity of participating countries
Target 4: Training institutions and scientific associations	Partnerships contracts	N° of published videos N° of classes organized N° of signed contracts	Diversification of specialties Diversity of participating countries

Table 5. Measurable performance indicators.

12- Customer experience:

	To convince me	To retain me
Engineers	Technically rich content and scientifically correct Information / training that responds quickly to my technical need	- Present Novelties regularly - Maintain a high level quality - Diversify content
PhD, Master students	- Scientific content whose source is traceable and reliable - An OpenAccess offer available	- Quality training at a affordable Price - Customer service
Instructor	- Software easy to use to gain time - A peer review and publishing service that brings me added value (visibility + income)	- May my publications be profitable - That the virtual classes that I organize find a good audience - That I gain international visibility
Institutions or associations	- A secure platform that publishes my content for my members / agents - A good service that allows me to reduce my publication costs, - Hosting and prospecting	- Customer service - Quality service - A gain in notoriety and international visibility

Table 6. How to grow and fidelize clients.

Details about the internship

The growth of the Internet has changed both businesses and the way people interact. It introduced new models of commerce, new ways to market products, new ways of monitoring customer feedback, and essentially changed everything about marketing."

Community management is the backbone of any business that wants to market itself. It's important to measure, monitor, engage and build relationships with your community. It is no longer just about managing users in a social network. Today's community managers are responsible for maintaining an established and loyal user base that empowers the organization, and driving business development. Community managers are instrumental in building a brand's reputation and maintaining its visibility on the Internet.

In this 6-week internship I was able to learn about the different forms of online marketing, develop a deep understanding of SEO and social media marketing, as well as get hands on community management and e-mail marketing .

During this internship I discovered numerous aspects of community management such as information gathering, keyword research, social media content creation , and visual content creation . These different forms of social media represent the four key areas of online marketing: SEO/SEM on the web, social media on Facebook or Twitter, ads on YouTube videos or Instagram photos, and e-mail marketing.

During the first week I started to get familiarized with the company and its concept, I was assigned to create an instagram page for the company and to find a list of contacts that can be related to the company instagram page whether they post similar content or have similar concept.

For the second and third week I prepared a posting schedule for each social media platform in order to be active during the whole week and get the highest engagement rate , I used a posting planner software to facilitate things so I can plan the whole week posts in advance and focus on other things. I was also assigned to work on the MEP'10 contest which is a contest organized by Knowledge and Skills in its first edition where contestants can apply and send a 10 minutes video explaining an experimental process related to mechanical or material engineering, and the top 3 videos will get a prize each. I was concerned with composing a blog article to publish on the website blog and creating visual content suitable for each social network in order to promote this competition .

For the forth and fifth week I was in charge with the organization of the webinar in which there was a short presentation of KS-Portal for Talent users. I was assigned to choose a suitable online platform where we can host the webinar and to create banners and posters and a promotional

video to post it on the different social networks. During this task I worked more on the SEO part and how to create a live Youtube event and make rank organically without using SEM. I used Videly in order to get a closer look on the keywords that can be used to create the perfect video description that can help rank n°1 on search engines.

Figure 5. Instagram home page of Knowledge and Skills corporation.

Figure 6. Preparation of social media communication content scheduled using Planner.

Figure 7. Prospection graphic support destined to LinkedIn.

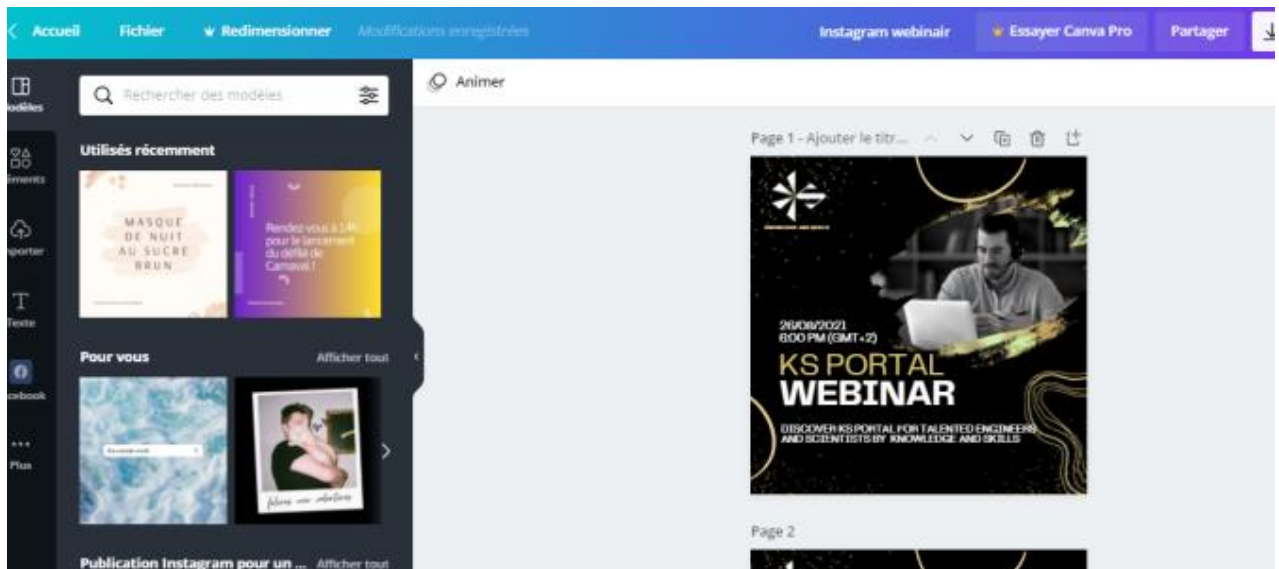

Figure 8. Preparing the webinar prospection graphic support using the software Canva.

Figure 9. Prospection banner inside the webinar event page on Facebook.

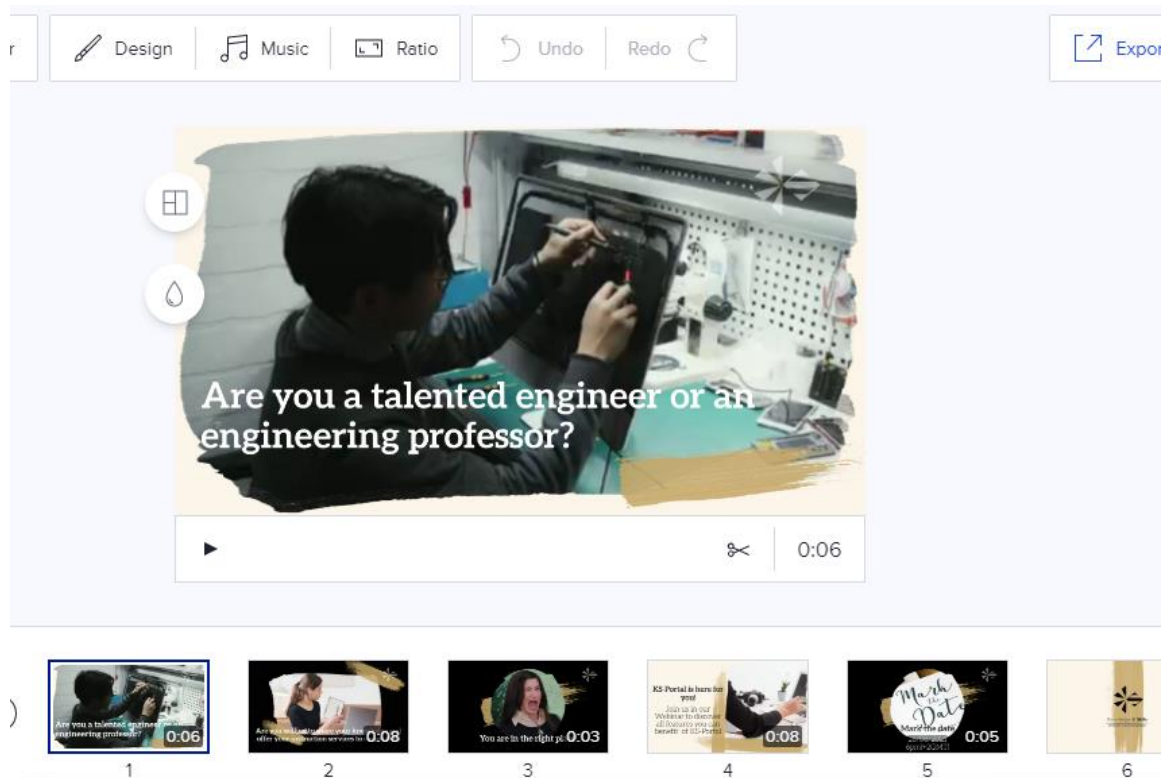

Figure 10. Preparation of the video support for the webinar prospection using Animoto SaaS

The screenshot displays the Videly SaaS interface for video description optimization. On the left, a table lists suggested keywords and titles. The first row is selected, showing the keyword 'engineering courses online france' and the title 'Engineering Courses Online France'. Other suggestions include 'online tutoring services for college students', 'online learning platforms for engineering students', 'online teaching platforms for teachers', and 'génie mécanique'.

KEYWORD	TITLE
✓ ☒ engineering courses online france	Engineering Courses Online France
☐ online tutoring services for college students	Online Tutoring Services For College
☐ online learning platforms for engineering students	Online Learning Platforms For Engi
☐ online teaching platforms for teachers	Online Teaching Platforms For Teac
☐ génie mécanique	génie mécanique soutenance de

On the right, the video description is being edited. It includes a title 'Engineering Courses Online France' and a subtitle 'Engineering Websites Out!'. The description text is as follows:

 This video is showing engineering courses online france sub information but we also try to cover the subjects:
 - engineering websites for students
 - top engineering sites
 - engineering students sites

Figure 11. Optimizing the video description with automatically generated keywords using Videly SaaS for SEO optimization on Youtube and Google research engine.

I was also introduced to e-mail marketing and how to send and create newsletters (which software to use , the format of the newsletter...) to the prospects which is an important phase of the marketing process.

During the internship I was continuing my learning process to get the google certificate in the fundamentals of digital marketing that was recommended by my supervisor and I finally got it after 5 weeks of learning. This course helped me gain more knowledge and understand more the world of digital marketing and how internet has created endless opportunities for businesses to expand more globally and retain more customers.

Maram Ben haddada

is hereby awarded this certificate of achievement for the successful
completion of **The Fundamentals of Digital Marketing** certification exam
